SUMMARY

Driven **Data Analyst** with full-stack analytics capabilities, experienced in translating complex data into actionable business intelligence. Successfully designed dashboards and automation workflows that significantly reduced reporting time and improved decision accuracy. Seeking opportunities to leverage expertise in Python, SQL, and Tableau to drive data-centric solutions and support strategic business goals.

EXPERIENCE

Analytics Engineer

OR Technologies Sdn Bhd

September 2025 - Present

- Collaborated directly with business stakeholders to understand reporting needs and translate them into **actionable, data-driven insights**.
- Designed and deployed interactive dashboards and automation workflows that **reduced report preparation time significantly** and improved decision accuracy.
- Enabled faster and more reliable data reporting for Business Intelligence (BI) teams by maintaining data quality and improving pipelines using Alteryx and Tableau.

Artificial Intelligence Researcher Intern

TM Research & Development

October 2024 - April 2025

- Conducted extensive **data analysis and feature engineering** for OCR-based models (XGBoost, CNN) to extract key business metrics from documents.
- Integrated FastAPI and PostgreSQL to provide structured data access and develop metric validation dashboards.

PROJECT

NFL Big Data Bowl 2026 Analysis

github.com/sofaquitegud/NFL_Big_Data_Bowl_2026

- Analyzed over 560K records of NFL player-tracking data across 18 weeks using Python (Pandas/NumPy) to explore player speed and movement trends.
- Built spatial metrics and visualizations to highlight positional performance and player clustering.
- Delivered insights on positional speed variability and play zone structure through **Exploratory Data Analysis (EDA) and visual storytelling**.

Sales and Use Tax Calculation Automation

github.com/sofaquitegud/sales-use-tax-analytics

- Automated multi-state Sales and Use Tax calculations using Alteryx, **cutting manual processing time by 70%**.
- Applied complex jurisdiction-based tax rules and validation checks, **improving calculation accuracy by ~95%**.
- Built an **interactive Tableau dashboard** for tax visualization, enhancing audit and reporting efficiency by 50%.

Staff Health Metrics Tool

github.com/sofaquitegud/ehealth

- Designed an internal analytics dashboard for employee health metrics using Python and statistical methods.
- Automated data processing and visualization for management reporting.

SKILLS

BI & Reporting Tools: Tableau, Alteryx

Languages & Databases: Python (Pandas, NumPy, Matplotlib, Plotly, Scikit-learn), SQL, PostgreSQL

Analytics: Data Visualization, Exploratory Data Analysis (EDA), Dashboard Design, Data Wrangling, Feature Engineering

Other Tools: FastAPI, Git

EDUCATION

Bachelor of Computer Science (Honours), Data Science and Computational Intelligence

International Islamic University Malaysia • 2025

CERTIFICATIONS

Alteryx Designer Advanced Certification

Alteryx • 2025

Google Business Intelligence Specialization

Google • 2025

Google Advanced Data Analytics Specialization

Google • 2025
