SUMMARY

Data Analyst & Analytics Engineer experienced in data transformation, exploratory analysis, and insight generation. Skilled in Python, SQL, and Alteryx, with a focus on ensuring data quality and delivering actionable insights.

EXPERIENCE

Analytics Engineer

OR Technologies Sdn Bhd

September 2025 - Present

- Supported BI teams by improving data pipelines and ensuring data quality using Alteryx and SQL.
- Designed dashboards and automation workflows that reduced report preparation time and improved decision accuracy.
- Collaborated with stakeholders to translate reporting needs into data-driven insights.

Artificial Intelligence Researcher

TM Research & Development

October 2024 - April 2025

- Conducted data analysis and feature engineering for OCR-based models (XGBoost, CNN) to extract key metrics from documents.
- Integrated FastAPI and PostgreSQL for structured data access and metric validation dashboards.

SKILLS

Tools: Python, SQL, Alteryx, Tableau, FastAPI, PostgreSQL, Git

Analytics: Data Visualization, EDA, Dashboard Design, Data Wrangling, Feature Engineering

Libraries: Pandas, NumPy, Matplotlib, Plotly, Scikit-learn

PROJECT

NFL Big Data Bowl 2026 Analysis

Personal Project • github.com/sofaquitegud/NFL_Big_Data_Bowl_2026 • November 2025 - November 2025

- Analyzed 18 weeks of NFL player-tracking data (560K+ records) using Python to explore speed and movement trends.
- Built spatial metrics and visualizations to highlight positional performance and player clustering.
- Delivered insights on positional speed variability and play zone structure through EDA and visual storytelling.

Sales & Use Tax Calculation Automation

ORTech • github.com/sofaquitegud/sales-use-tax-analytics • October 2025 - October 2025

- Automated multi-state Sales & Use Tax calculations using **Alteryx**, cutting manual processing time by **70%**.
- Applied jurisdiction-based tax rules and validation checks, improving calculation accuracy by **~95%**.
- Built an interactive **Tableau dashboard** for tax visualization, enhancing audit and reporting efficiency by **50%**.

Staff Health Metrics Tool

Internal TMRND project • github.com/sofaquitegud/ehealth • January 2025 - April 2025

- Designed an internal analytics dashboard for employee health metrics using Python and statistical methods.
- Automated data processing and visualization for management reporting.

EDUCATION

Bachelor of Computer Science (Honours), Data Science and Computational Intelligence

International Islamic University Malaysia • Gombak, Selangor, Malaysia • 2025

CERTIFICATIONS

Alteryx Designer Advanced Certification

Alteryx • 2025

Google Advanced Data Analytics Specialization

Google Business Intelligence Specialization
